WESTERN SYDNEY UNIVERSITY

MARCS Institute for Brain, Behaviour and Development

PhD SCHOLARSHIP

ACTIVE VISION AND MEMORY

How voluntary control shapes visual recognition and memory

FULLY FUNDED | $38,707 TAX-FREE P.A. STIPEND FOR 3 YEARS

The project

Investigate how people recognise and remember visual information when they choose when and where to look. The project combines controlled behavioural experiments with EEG to examine brain activity as perception unfolds.

RESEARCH FOCUS

- visual perception
- attention and decision-making
- recognition and memory
- EEG and cognitive neuroscience

SUITABLE BACKGROUNDS

- psychology or cognitive science
- neuroscience or vision science
- experience with research methods
- interest in postgraduate research

MARCS INSTITUTE

The candidate will join a collaborative cognitive neuroscience research environment at Western Sydney University, with expert supervision and world-class research facilities.
